DYNEMECH INSULATION PLATES

Dynemech
VIBRATION TECHNOLOGY

Dynemech Insulation Plates are made from the compound of Nitrile Rubber, Cork, Synthetic Fibre which at varying compositions gives different natural frequencies for providing vibration damping solution to almost every machine tool.

	TYPE	LOAD Kg./Sq.cm.	THKS. mm.	APPLICATIONS
	Du	3 - 9	15	Tool Room Machines, Plastic Injection Moulding Machines, Pressure Die Casting Machines, Printing and Textile Machines (For Machines having high axial forces.) Coefficient of friction 0.9, Natural Frequency range 35 Hz-18 Hz.
	Du-10	3 - 9	10	Tool Room Machines, Plastic Injection Moulding Machines, Pressure Die Casting Machines, Printing and Textile Machines (For Machines having high axial forces.) Coefficient of friction 0.9, Natural Frequency range 35 Hz-18 Hz.
	Du-12	3 - 9	12	Tool Room Machines, Plastic Injection Moulding Machines, Pressure Die Casting Machines, Printing and Textile Machines (For Machines having high axial forces.) Coefficient of friction 0.9, Natural Frequency range 35 Hz-18 Hz.
	Dm	5 - 10	15	Lathe Machines, Milling Machines, Grinding Machines, Machining Centres, Turning Centres etc. Coefficient of friction 0.7, Natural Frequency range 50 Hz-30 Hz.
	Di	5 - 14	25	For machines with high vertical dynamic forces such as Power Presses, Punching Machines, Stamping Machines, Shearing Machines etc. Coefficient of friction 0.8, Natural Frequency range 25 Hz-7 Hz.
	Dp1	1 - 4	15	Tuned to low natural frequency, suitable for passive vibration control of Measuring & Testing Machines, Grinders etc. Coefficient of friction 0.8, Natural Frequency range 20 Hz-7 Hz.
	Dp2	1 - 5	20	Suitable for passive vibration control of measuring & testing machines maintains machines stability along with vibration reduction. Coefficient of friction 0.8, Natural Frequency range 30 Hz-12 Hz.
	Dp3	2 - 6	24	Tuned to low natural frequency, suitable for both active & passive vibration isolation of metrology and production machines. Coefficient of friction 0.8, Natural Frequency range 15 Hz - 7 Hz.
	Ds1	2 - 5	20	Light Weight Presses, Tool Room Machines, Compressors etc. on Ground Floor as well as upper Floors. Coefficient of friction 0.8, Natural Frequency range 35 Hz-15 Hz.

Dynemech Insulation Plates are made from the compound of Nitrile Rubber, Cork, Synthetic Fibre which at varying compositions gives different natural frequencies for providing vibration damping solution to almost every machine tool.

	TYPE	LOAD Kg./Sq.cm.	THKS. mm.	APPLICATIONS
	Ds2	2 - 8	25	High Vibration Insulation for both active and passive range, Medium Presses, Stamping Machines, also well suited for high speed rotating machines on upper floors. Coefficient of friction 0.8, Natural Frequency range 35 Hz-8 Hz.
	Dhs1	5 - 20	65	Forging Hammers, Heavy Gen Sets, Heavy Industrial Machines, Test Rigs, Heavy Presses etc. Coefficient of friction 0.8, Natural Frequency range 12Hz - 6Hz.
	Dhs2	2 - 8	65	Forging Hammers, Heavy Gen Sets, Heavy Industrial Machines, Test Rigs, Heavy Presses, Crushers etc. Coefficient of friction 0.8, Natural Frequency range 8Hz - 4Hz.
	Dhs3	4 - 28	50	Forging Hammers, Heavy Gen Sets, Heavy Industrial Machines, Test Rigs, Heavy Presses etc. Coefficient of friction 0.8, Natural Frequency range 15Hz - 7Hz.
	Dhs4	3 - 12	50	Forging Hammers, Heavy Gen Sets, Heavy Industrial Machines, Test Rigs, Heavy Presses, Crushers etc. Coefficient of friction 0.8, Natural Frequency range 8Hz - 5Hz.
	Dhs5	4 - 28	80	Forging Hammers, Heavy Gen Sets, Heavy Industrial Machines, Test Rigs, Heavy Presses etc. Coefficient of friction 0.8, Natural Frequency range 12Hz - 5Hz.
	Dh	10 - 35	15	Very Heavy and Long Bed Machines, Long Machining centres, Planners etc. Coefficient of friction 0.6, Natural Frequency range 70Hz - 45Hz.
	Da1	2 - 18	2	Anti-Skid Plate
	Da2	2 - 10	8	Anti-Skid Plate

WEDGE MOUNTS Series DF and DFP

Dynemech
VIBRATION TECHNOLOGY

Series DF

Series DFP

Dynemech Wedge Mounts, Series DF are designed for industrial machine tools that require precision levelling assembled with respective Dynemech Insulation Plates.

Dynemech Wedge Mounts, Series DFP have a height of 100/150mm at mean position to help proper cleaning and repairing under the machines, with specs similar to series DF.

Model	Load (Kg/pc)	Length L (mm)	Width B (mm)	Height (H) at mean position (mm)	Adjustment range (mm)	APPLICATIONS
DF1-u	400	105	55	60	8	Top anti skid plate Da2 & bottom insulation plate Du. Applications : Tool Room Machines, Plastic Injection Moulding Machines, Pressure Die Casting Machines, Shaper, Printing and Textile Machines etc.
DF2-u	900	150	75	63	10	
DF3-u	1500	200	100	70	10	
DF4-u	3200	200	200	73	12

DF7-p2	4400	300	400	97	20	
DF8-p2	7500	400	500	102	20	

Series DFH

DFHs are sturdy in construction, useful for installing very heavy or long bedded machines.

Series DFPH

DFPHs are sturdy in construction, with a height of 150mm to meet TPM guidelines & installing very heavy or long bedded machines at a height.

Series DFSP

Spherical Positioners on Free standing Wedge, Series DF, transmit the load of the machine to the ground despite angle difference between machine base & foundation.

Series DB

Dynemech Wedge Mounts Series DB are designed for industrial machine tools that require precision levelling, vibration reduction and/or need to be firmly mounted with the isolator.

Dynemech Wedge Mounts Series DBP have a height of 100/150mm at mean position to help proper cleaning and repairing under the machines, with specs similar to series DB.

Model	Load (Kg/pc)	Length L (mm)	Width B (mm)	Height (H) at mean position (mm)	d (mm)	e (mm)	Bolt size (mm)	Adjustment range (mm)	APPLICATIONS

TAPER SHIM LEVELLING MOUNTS Series TSOH/TSPOH

Taper Shim Levelling Mounts, Series TSOH have a flange at the bottom to provide precise levelling after fixing the structure to the ground for stiff support to the equipment. Their innovative casted taper shim plate design ensures optimal weight distribution, resulting in remarkable horizontal stability across the entire levelling range. Despite the tendency of machines to move, the floor anchor functions to increase stability rather than even for machines which produce high horizontal forces or for machines in which the center of gravity lies much above the center of the machine such as pressure die casting, injection molding machines, presses, industrial pumps and stamping machines.

Series TSOH

Series TSPOH

SCREW SUPPORT MOUNTS Series DL/DLS

Series DL

Dynemech DL Series Mounts is used for light to medium weight machines suited to levelling screw support or having tapped hole in the base.

Dynemech DLS Series Mounts, developed in stainless steel finds application in pharmaceutical, food and beverages processing and packaging units, medical equipment manufacturing and chemical processing industries. Provide vibration isolation with complete hygienic seal and corrosion resistance.

Series DLM

Type-M
One nut Fixed with
bolt & two nuts free

Type-RA
One nut Fixed with
bolt & two nuts free

Type-F
Two Free nuts & bolt fixed

Dynemech DLM/DLMS Series Mounts, developed in steel and stainless steel respectively are simple and effective vibration dampers for machines with respective holes in the base. these mounts offer low frequency attenuation, stable machine levelling and vibration reduction. the flexible levelling screw accommodate uneven/sloped surfaces upto 5°. DLMS series find application where corrosion resistant materials for hygienic, climatic and environmental reasons are required like in pharmaceutical, food and beverages processing and packaging units, medical equipments manufacturing and chemical processing industries.

Series DLT

SCREW SUPPORT MOUNTS Series DLT

Dynemech DLT Series Mounts are used in the machines which must be anchored to the floor along with levelling and vibration reduction. Bolts with thru holes are provided in the machine foot and anchor bolt passes from the machine foot, mount and anchored in the floor nut. an insulating disc is provided between the nut and the machine foot to prevent vibration from transmitting in the floor via the bolt. the dimple and the thru hole in the mount are provided as per the bolt specifications of the machine.

SCREW SUPPORT MOUNTS Series DLK

Dynemech
VIBRATION TECHNOLOGY

Series DLK

Dynemech Screw Support Mounts Series DLK are simple and effective vibration dampers for machines with respective holes in the base. These mounts offer both low frequency attenuation and stable machine levelling. The DLK Series vibration damping and levelling mounts provide fast and easy installation of machines. DLK Series anti vibration mounts have steel body and are used for machines having mounting holes in the base. This levelling mount has a cover plate and dimpled bottom plate holding the insulation plate. Levelling is done by tightening the bolt which lifts the cover plate with the machine base.

Model	Load (Kg/pc)	Bolt Size	D (mm)	H (mm)	Adj. Range (mm)	APPLICATIONS
DLK1-a	580	M12 x 100	92	50	10	Textile Machines, CNC Machines, Power Presses, Plastic Injection Moulding Machines, Pressure Die Casting Machines, Printing Machines, Compressors, Grinding Machines and All types of Heavy Industrial Applications.

DLK3-c	4200	M20 x 150	195	58	12	

SCREW SUPPORT MOUNTS Series DLK-4

Series DLK-4

Dynemech Screw Support Mounts Series DLK-4 are suitable for heavy machine installations. They provide additional damping in shear and radial directions.

Model	Load (Kg/pc)	Bolt Size	D (mm)	H (mm)	Adj. Range (mm)	APPLICATIONS
DLK4-a	4000	M24 x 150	238	78	20	Textile Machines, CNC Machines, Power Presses, Plastic Injection Moulding Machines, Pressure Die Casting Machines, Printing and Packaging Machines, Compressors, Grinding Machines and All types of Heavy Industrial Applications.
DLK4-b	5000	M24 x 150	238	78	20	
DLK4-c	6000	M24 x 150	238	78	20	

Note : DLK-4 Series Bolt Sizes M-10, M12, M16, M20, M24, M30 possible on special request.

Series DLKR-03

Series DLKR-04

Dynemech Screw Support Mounts Series DLKR provides a large rectangular surface to support machines along with the levelling adjustment. The longer side is installed parallel to the line of operation of the horizontal force generated by the machine thus ensuring better grip and higher shock isolation.

S.No.	Model	Load Capacity (Kg/pc)	Length L (mm)	Width B (mm)	Height H (mm)	Thread Size G (mm)	h (mm)	Levelling Adjustment (mm)

SL4-p1	900	150	150	29
SL5-p1	1600	200	200	39

Dynemech Machine Base Mounts Series SL is used for light to medium weight machines suited to levelling screw support or having tapped hole in the base. These are suitable for placing in the pocket of the machine base.

Dynemech Machine Base Mounts Series SLS, developed in stainless steel finds application in pharmaceutical, food and beverages processing and packaging units, medical equipment manufacturing and chemical processing industries. Provide vibration isolation with complete hygienic seal and corrosion resistance.

JACKUP MOUNTS Series DJM

Dynemech
VIBRATION TECHNOLOGY

Series-DJM

Adapter with M20x2.5 Inner Thread
and M40x2 External Thread

Leveling Sockets

The levelling sockets are provided for many possible types of installations as per customers requirement.

Bolt-through
25mm diameter bore

Leveling socket
with anti-skid pad

Countersink as per customer
requirement and bolt profile

Dynemech Jackup Mounts provides isolation solutions for various machines and mounting conditions. The Dynemech Jackup Mounts also provide for high machine leveling capabilities. These Jackup mounts provide high load capacity and best level stability. The bottom design provides for non-skid properties for the Jackup Mount. The Jackup mount also provide very good passive vibration isolation.

Applications : Machine Tools, Textile Machine, Graphics machines, Planners long bedded machines etc.

Model	Load (Kg/pc)	Height H (mm)	Dia D (mm)	G (mm)	HEX SW (mm)	Levelling Adjustment (mm)
DJM-0	850	49	90	M20 x 2.5 (Length 38mm)	46	18
DJM-1	1500	49	120	M20 x 2.5 (Length 38mm)	46	18
DJM-2	2500	49	160	M20 x 2.5 (Length 38mm)	62	18

Note: Please mention type of socket required at the time of ordering.

LEVEL GRIP MOUNTS Series DRM

DRM1-150-S2

DRM1-232-S2

DRM mounts levelling is done using a large lever screw. This screw transmits static and dynamic load of the machine on a larger area and thus provides greater stability to the machine. The levelling lever requires lesser torque for lifting the machine while levelling.

S. No.	Model	Load (Kg/pc)	Length L (mm)	Width B (mm)	Height H (mm)	Levelling Adjustment (mm)
1.	DRM1-150-S2	1000	150	150	77	20
2.	DRM1-232-S2	3300	232	232	77	20

DYNEMECH MACHINERY RAISER DAMPING BLOCKS offer easy and quick installation of CNC machines. These blocks offer both levelling and vibration damping besides raising height of the machine for proper cleaning and repairing under it.

Series-DRC

Series DRC are suitable for machines having plain hole in the base. Levelling is done by turning the bolt which lifts the cover plate along with the machine. Available both in 150 & 100 mm height.

Model	Load Kg/pc	Model	Load Kg/pc	Model	Load Kg/pc	Model	Load Kg/pc	Bolt Size	d (mm)	Dia D (mm)	H u/m/h	H s2	Adj. (mm)

Series-DRS

MACHINERY RAISER DAMPING BLOCKS Series DRS

Dynemech Series DRS mounts are available in different heights as per the required ground clearance. The options of threading and dimple are available for levelling the machine. The vibration reduction is done using vibration isolation sheet of tuned natural frequency under the base of this mount.

S.No.	Model	Load Capacity (Kg/pc)	Height H (mm)	A (mm)	Dimple	Natural Frequency	Co-efficient of Friction
1.	DRS1-50-m	1160	50	150	28	30	0.7

5.	DRS2-65-u	7200	65	150	32	45	0.6

* Dimple size can be customized as per available bolt size.

COMPAC MACHINERY MOUNTS Series DH

Dynemech
VIBRATION TECHNOLOGY

Series-DH

Dynemech Compac Machinery Mounts uses rubber in compression and shear. They provide tight tolerances on stiffness rate for accurate vibration calculations. Load range is from 40 to 130 Kgs per piece. The strong base metal withstands high shock loads without deformation. Fitted as standard with a shock-proof device (up to 4.5g) with resilient stop, it is ideal for mobile or marine use. Domed shape cover to protect against oil contamination. Light weight and compact. Ideal for **Diesel engines, Compressors Cooling Towers, Pumps, Industrial generators, Marine generators, ID, FDFans** etc.

Model	D (mm)	A (mm)	H (mm)	K (mm)	d (mm)	G	Weight (Kg.)	Load Capacity (Kg.)
DH 1	64	76	35	93	9.5	M12/M10	0.22	130
DH 2	64	76	35	93	9.5	M12/M10	0.22	105
DH 3	64	76	35	93	9.5	M12/M10	0.22	70

TEXL FOOT MOUNTS Series DTXL

Series DTXL

Low cost solution for Shock Absorption and Vibration control. Rugged CI body mount provide option for low height machinery installation option. Simple, ready to install configuration with top cup and bottom base plate bolting options. Provides stability, smoother operation and reduced maintenance in machinery. High efficiency, stable fixed support, long service life of mounts ensures greater productivity of machinery.

Model	A (mm)	H (mm)	G (mm)	Ød (mm)	F (mm)	C (mm)	Load (Kg/pc)
DTXL-1	108	38	M12	13	175	148	500

Note : Bolt sizes available as optional accessories for Texl Foot Mounts.

DYNEMECH Stud Mounts, Series DS are highly effective and compact vibration dampers for a variety of applications like - Compressors, Pumps, ID & FD fans, Motors, Machine tools, Gensets, Air Conditioners, Measuring and Testing Equipments /Instruments, Material Handling Equipments, Laboratory Equipments etc. These mounts can be used for load applications in both compression and shear.

MAC LEVEL MOUNTS Series DML

Dynemech
VIBRATION TECHNOLOGY

Series DML

Dynemech Mac Level, Series DML is suitable for high speed rotating machines having small or no axial forces.

Model	Max.Load (Kg)	D (mm)	H (mm)	d (mm)	Levelling Adjustment (mm)	Natural Frequency at Max. Load (Hz)	Bolt
DML 1	175	50	40	32	10	7	M10

DML 5	4000	200	63	120	20	8	M20

HORIZONTAL STOPS Series DHS

Series DHS

Dynemech Horizontal Stop Series DHS is suitable for the shock absorption of machines having very high axial force on a light weight machine bed and for precision machines which has to be flexibly mounted but be protected from horizontal shaking due to inherent axial movements of their elements.

MODEL	H (mm)	L (mm)	B (mm)	a (mm)	b (mm)	e (mm)	l (mm)	m (mm)	n (mm)
DHS 1	150	150	125	50	65	25	125	100	75
DHS 2	200	150	125	50	65	25	175	150	125
DHS 3	200	175	150	60	75	30	215	180	150

Vibration Measurement and Analysis

Dynemech conducts highly accurate **FFT Analysis** before the selection of the anti vibration system for very precise measuring equipment like CMM, Gear profile testers, Contour testing machines.

The FFT works by taking a time-domain signal, which is a signal that varies with time, and transforming it into a frequency-domain signal, which shows how the signal varies with frequency.

Dynemech Vibration Measurement and FFT Analysis is a powerful tool for analyzing signals because it allows us to identify specific frequency components that may be important for a particular application.

Series DGF

Dynemech Flexi Foot Mounts, Series DGF is well suited for machines requiring vibration damping in both compression and shear. An anti skid plate is provided in the base of the mount to prevent machine walking. These mounts can also be anchored to the floor through the holes provided in the base for machines producing high unbalance forces.

Applications : Generators, Blowers, Pumps, ID & FD Fans, Cooling Towers, etc.

SANDWICH MOUNTS Series DMS

Dynemech
VIBRATION TECHNOLOGY

Dynemech Sandwich Mounts Series DMS comprise one or more layers of elastomer bonded to flat steel plates. They are designed to withstand very high compressive loads. These mounts have large supporting surface area and are slim. These mounts can also be stacked to achieve lower natural frequencies.

S.No.	Model	MAX Load (Kg)	LxB (mm)	CxD (mm)	CC (mm)	H (mm)	l (mm)	Natural Frequency (Hz)	Bolt

SANDWICH MOUNTS Series DSM

Dynemech Sandwich Mounts Series DSM are available in various standard and customized sizes. These mounts provides support to motors, pumps and equipment installed on a machine body. These mounts provides high vibration isolation efficiency.

Series VHS

VHS Festofix are useful in leveling and aligning machinery to very strict tolerances, Making it possible to vary adjustments at any times, even under maximum load.

Benefits include:

- Built-in compensation for uneven areas in foundations and machine bases.

These benefits make the VHS Series Festofix Levelling Wedges the "state-of-the-art" anchoring/alignment system.

Model	Recommended Load (Kg/pc)	Max. Load (Kg/pc)	L (mm)	L1 (mm)	B (mm)	H (mm)	D (mm)	h (mm)	f (mm)	G	a (mm)	SW1	SW2	e1	e2

Applications: For the Levelling, Adjustment & Fixation of Large Machinery and other Heavy Equipment like Boilers, Turbines, Generators, Long-bedded lathes etc. **Note:** Please select dimensions 'G' or 'F' at the time of order.

PRECISION LEVELLING MOUNTS Series VHS-LA

Series VHS-LA

VHS-LA series mounts provides precision levelling to the machine. The leveling is possible even after grouting the outer body of this mount. A slight horizontal alignment of long bedded machines is possible using this mount.

Model	Recommended Load (Kg/pc)	Max. Load (Kg/pc)	L (mm)	L1 (mm)	B (mm)	D (mm)	h (mm)	f (mm)	G	a (mm)	SW1	SW2	e1	e2	H (mm)	Total height with Lateral adjuster H1 (mm)	Lateral Adjuster Bolt Size (SW3)

HIGH PRECISION LEVELLING & ALIGNMENT MOUNTS Series DFL

Dynemech
VIBRATION TECHNOLOGY

The DFL series mounts are made from a high grade casting body. Large supporting surface and high levelling adjustment is available. The slot in the middle allows placement of these mounts after the grouting bolts are fixed in the foundation. Suitable for VTL, long bedded CNC machines, large boring machines, plano miller etc.

Series DRAS

Dynemech Rubber Air Springs, Series DRAS provide highly effective insulation of machines against low frequency vibration/impact. The element offers a vertical natural frequencies between 2.5 to 6.0 Hz*. The component has vertical to horizontal stiffness ratio of approximately one. Suited for both active and passive vibration control.

Model	Load (Kg/pc)	Max. Pressure Bar	S (mm)	D (mm)	H App. (mm)	d (mm)	h (mm)	Bolt
DRAS1	25 - 60	3	96	85	64	42	6	M10
DRAS2	80 - 300	5	126	123	69	80	6	M12
DRAS3	270 - 800	6	182	175	85	100	6	M16
DRAS4	650 - 1500	6	252	250	105	127	8	M16
DRAS5	1200 - 3400	6	370	357	105	200	8	M20
DRAS6	3000 - 6500	6	500	480	110	315	8	M20

* Depending upon the pressure required to support the load.

Applications : Active isolation of high speed Power Presses, Textile Machines, Vibration Test Rigs, Engine Test Beds, Blowers etc. and Passive Insulation of Measuring & Testing Machines/Equipments, High Precision Grinding/Polishing Machines, Surface Plates, Spectrometers etc.

RUBBER AIR SPRINGS Series DLPM (Self Levelling)

Series DLPM

Dynemech Rubber Air Springs Series DLPM system consists of three master pneumatic isolators for 3-point precision levelling. Each pneumatic damping isolator consists of a levelling valve which is the load sensing and height controlling element. Systems are supplied with automatic height control valves, tubing and all other pneumatic accessories necessary for complete system installation. Dynemech DLPM Mounts have minimal setting time.

Isolation Characteristics : Natural Frequency for the Pneumatic Isolator Vertical - 4-6 Hz

Damping : Vertical (Adj.) 6% - 20%, Horizontal 5% - 6%

Levelling Accuracy of ± 0.15 mm/m and ± 0.015 mm/m is available.

Model	Load (Kg/pc)	Max. Pressure Bar	S (mm)	D (mm)	H App. (mm)	d (mm)	h (mm)	Bolt
DLPM1	25 - 60	3	100x170	85	64	42	6	M10
DLPM2	80 - 300	5	130x200	123	69	80	6	M12
DLPM3	270 - 800	6	180x235	175	88	100	6	M16
DLPM4	650 - 1500	6	252x302	250	108	127	8	M16
DLPM5	1200 - 3400	6	370x420	357	111	200	8	M20
DLPM6	3000 - 6500	6	500x550	480	114	315	8	M20

* As we are constantly upgrading our products specifications are subject to change without notice.

MEMBRANE AIR SPRING Series DMAS-SH/SL

Dynemech
VIBRATION TECHNOLOGY

Series DMAS-SH/SL

Dynemech DMAS system consists of three master pneumatic isolators for 3-point precision levelling. Each pneumatic damping isolator consists of a self-levelling plunger mechanism, which is the load sensing, and height-controlling element. The system is supplied with pressure regulator, distributor, non-return valve and other pneumatic accessories necessary for complete systems installation. Clean dry air is required to be supplied to the system.

The DMAS is lightweight aluminium body. The inner chamber is split into two parts i.e. load volume and damping volume. Damping up to 20% can be adjusted using external valve manually. A thin reinforced elastomeric diaphragm supports the load. A safety valve protects diaphragm from over inflation. The final precise levelling of the system can be done using levelling nut provided on the plunger mechanism.

Available levelling accuracies are ± 0.015 mm and ± 0.15 mm depending upon the application requirements.

Natural frequency of the DMAS system is 2.5-3 Hz.

Model	D (mm)	H (mm)	L (mm)	Load Capacity at 4 bar (Kg)	Load Capacity at 6 bar (Kg)	Self Levelling Repeatability (mm)	Natural Frequency Vertical (Hz)
DMAS-SH1	110	102	190	120	180	± 0.015	2.5-3

Isolated Foundation for Active Vibration Damping for Power Presses, Forging Hammers, Engine Test Rigs, and Passive Vibration Isolation of Machining Centres, Grinding Machines, Measuring & Testing Equipments, Laser Cutters, Microscopes and CMM.

The ISOLATED FOUNDATION is required to reduce both active and passive vibrations.

A foundation isolation for high dynamic machines like **Power Press, Forging Hammers, Compressors, Engine Test Rigs** etc. is required in order to reduce the transmission of vibration and shock to nearby precision machines / building structures. To control the source of vibration disturbance through the use of resilient insulating materials is known as **ACTIVE VIBRATION ISOLATION**.

When it is not possible to prevent or sufficiently lower the transmission of shock and vibration from the source a resiliently supported vibration insulating foundation block can be used for the **PASSIVE VIBRATION ISOLATION** of sensitive equipments like **Machining Centres, Measuring and Testing Machines / Equipments** etc.

ISOLATED FOUNDATION lowers the centre of gravity of the machine foundation system and adds to the stability of the machine. Machine remains aligned during dynamic load changes and rapid movements within the machines.

FOUNDATION ISOLATION

SHOCK MOUNT Series DXO SP1

DXO-Sp1 series is designed for Very heavy machines which produce high shocks and are top heavy or have high rapid movements. These mounts provides stability to forging presses which have a very small area and are heavier on the top half. The base is equipped with multi layers of DHS1 insulation plates and the strong side support avoids lateral movement of the machine. Similarly for VMC machines these mounts provides high efficiency along with preventing machine shaking during high rapid.

Series DXO SP

S. No.	Model	Load Capacity (Kg)	L (mm)	W (mm)	A (mm)	B (mm)	C (mm)	D (mm)	H (mm)	Natural Frequency at Max. Load (Hz)
1.	DXO1-SP1	7,000	650	350	250	200	450	176	185	7.0
2.	DXO2-SP1	10,000	700	400	300	250	350	226	185	7.0
3.	DXO3-SP1	15,000	750	450	350	300	400	276	185	7.0
4.	DXO4-SP1	21,000	800	500	400	350	450	326	185	7.0

Pneumatic isolation system with cradle provides low CG and stability. High vibration isolation for precision measuring machines like CMM, Gear profile testers.

ADVANTAGES

-  High Vibration Isolation Performance.
-  Fast, Easy Machinery Installation - even on working machines with minimal down time.
-  Installation of Sensitive Quality Control and Testing Equipments and Heavy Production Machinery possible in the same workshop.
-  Flexible layout Floor Plan, ease in machine relocation to accommodate expansion plans & technology induction - Permanent mobility of CMM with DLPM Mounts.
-  Low Maintenance and Easy to Install.
-  Automatic Machine Levelling of $\pm 0.010\text{mm}$ and $\pm 0.2\text{mm}$ available.
-  Prevents forced deterioration of sensitive machine, expensive unscheduled downtime and maintenance resulting in production losses.
-  Solutions of different natural frequencies available to suit various vibration problems based on vibration analysis report.
-  Maintains measuring integrity of metrology equipments.

SHOCK RESISTANT/ANTI-VIBRATION TABLE WITH ELASTOMERIC ISOLATION

Dynemech
VIBRATION TECHNOLOGY

Series DIT-E

Dynemech Anti Vibration Tables - Series DIT-E are ideal for Testing / Quality Laboratories co-located with industrial units having high degree of vibration due to working machines like presses, hammers, VMCs etc. The Vibrations are isolated using Double-Layered Dp Elastomeric Sheets. These Anti-Vibration Tables have a Granite Surface Plate with Grade-00/Grade-1 accuracy for very precise measuring accuracies. The passive vibrations from nearby motors and other heavy machinery is reduced by 65-70%. The vibration isolation efficiency of these tables can be further increased by placing more than 2 layers of our Dp insulation Sheets. Five layers of DP exhibits a natural frequency of 7-8 Hz, which damps most of the incoming frequencies above 20 Hz.

APPLICATIONS : The Vibration Isolated Table (VIT) finds usage in critical areas where reading accuracy of instruments like Balances, Galvanometers, Electronic Microscopes and Atomic Absorption Spectrophotometers, is affected by Vibrations.

Model	Length (mm)	Width (mm)	Height (mm)	Surface Plate Thickness (mm)	Table Load Capacity (Kg)	Natural Frequency at Max. Load (Hz)
DIT-E/01	500	500	800-1000	80	up-to 250	7-8
DIT-E/01/s1	630	630	800-1000	80	up-to 250	7-8
DIT-E/02	750	500	800-1000	80	up-to 450	7-8
DIT-E/03	900	600	800-1000	100	up-to 1250	7-8
DIT-E/04	1000	800	800-1000	150	up-to 1250	7-8

* Special table sizes and designs can also be ordered as per client's requirement

SHOCK RESISTANT/ANTI-VIBRATION TABLE WITH AUTO LEVELLING PNEUMATIC VIBRATION MOUNTS

Series DIT-AM

Dynemech anti vibration table DIT-AM has natural frequency in the range of 1.5-2 Hz. along with self-levelling feature. Available self-levelling is +0.01mm and +0.1mm variants with minimum setting time. Membrane air springs damps most of the incoming vibration above 3Hz.

APPLICATIONS : Metrology equipments, High precision weighing balances, TGA, digital hardness testers, High resolution microscopes, surface roughness testers, etc.

Model	Length (mm)	Width (mm)	Height (mm)	Surface Plate Thickness (mm)	Table Load Capacity (Kg)	Natural Frequency at Max. Load (Hz)
DIT-AM/01	500	500	800-1000	80	up-to 400	2.5-3
DIT-AM/01/S1	630	630	800-1000	80	up-to 400	2.5-3
DIT-AM/02	750	500	800-1000	80	up-to 850	2.5-3
DIT-AM/03	900	600	800-1000	100	up-to 1150	2.5-3
DIT-AM/04	1000	800	800-1000	150	up-to 1200	2.5-3

* Special table sizes and higher loads can also be designed as per client's requirements.

Anti-vibration Table with Honeycomb Tabletop and Auto Levelling Pneumatic Vibration Mounts Series DIT AM-HC

Dynemech Anti Vibration Table DIT AM-HC has natural frequency in the range of 1-1.5 Hz along with self-levelling feature. Available self-levelling accuracy is ± 0.10 mm with minimum setting time, depending upon the application requirement. Membrane air springs are used which damps most of the incoming vibrations above 4 Hz. Level difference on top of the honey comb table top surface due to any load change and the equipment is compensated within milliseconds.

APPLICATIONS: Used in Optical industries, for mounting optical assemblies

Sl. No.	Model	Load Capacity (Kg.)	Length (mm)	Width (mm)	Height at mean position (mm)	Honeycomb Table Top Thickness (mm)
1.	DIT AM-HC 01-75759	upto 450	750	750	900	100
2.	DIT AM-HC 02-90609	upto 500	900	600	900	100
3.	DIT AM-HC 03-1008090	upto 600	1000	800	900	100

5.	DIT AM-HC 05-15012090	upto 800	1500	1200	900	150
6.	DIT AM-HC 06-18012090	upto 850	1800	1200	900	150
7.	DIT AM-HC 07-24015090	upto 1000	2400	1500	900	200

Shock Resistant/Anti-Vibration Table with Auto Levelling Pneumatic Isolation with Vibration Isolation Series DIT AHL

Dynemech Anti Vibration Table DIT-AHL has natural frequency in the range of 1.0-1.2 Hz along with self-levelling feature. The table has a sheet metal closed cabinet design. Available self-levelling accuracy is ± 0.1 mm and ± 0.01 mm with minimum setting time, depending upon the application requirement. membrane air springs are used which damps most of the incoming vibrations above 2.5 Hz. Top granite surface plate has flatness accuracy of Grade 00. Level difference on top of the granite surface due to any load change and the equipment is compensated within milliseconds.

APPLICATIONS: Metrology Equipments, High Precision Weighing Balances, TGA, Digital Hardness Testers, High Resolution Microscopes, surface roughness testers, etc.

Sl. No.	Model	Load Capacity (Kg.)	Length (mm)	Width (mm)	Height at mean position (mm)	Granite Table Top Thickness (mm)

ANTI VIBRATION PLATFORM Series VIP-E

Dynemech
VIBRATION TECHNOLOGY

Dynemech Anti Vibration Platform, are ideal for precision lab balances / microscopes/testing & measuring or scientific instruments and other vibration sensitive equipment like probes etc. They are suitable for equipment in Testing / Quality/Medical & Biological Laboratories co-located nearby industrial units/commercial units having high degree of vibration transmission due to vehicular traffic, HVAC installations and other vibration creating equipment. Audio centres and Research laboratories may find use of Dynemech Vibration Isolation Platforms for the vibration sensitive equipments.

Dynemech Anti Vibration Platform VIP-E The Vibrations are isolated using Double-Layered Dp Elastomeric Sheets where in vibration transmission by 65-70%. The vibration isolation efficiency of these tables can be further increased by placing more than 2 layers of our Dp insulation Sheets. Five layers of DP exhibits a natural frequency of 7-8 Hz. which damps most of the incoming frequencies above 15 Hz.

Sl. No.	Model	Load Capacity (Kg.)	Length L (mm)	Width B (mm)	Height H (mm)	Top Plate Thickness T (mm)
1.	VIP-E 01	upto 100	500	500	170	10

7.	VIP-E 06	upto 750	1800	1200	200	25

ANTI VIBRATION PLATFORM Series VIP-AM

Dynemech Anti Vibration Platform VIP-AM has natural frequency in the range of 1.5-2 Hz along with self - levelling feature. Available self-levelling is +0.01 mm and +0.1 mm variants with minimum setting time. Membrane air springs damps most of the the incoming vibrations above 3 Hz.

SPRING ISOLATORS Series MAI/MBI/MDI

Dynemech
VIBRATION TECHNOLOGY

Dynemech Spring Isolator gives desired natural frequency to obtain phase difference in the frequencies for a rotating machine and impact generating machine. Viscous damping is an important feature of an isolation system. In most cases viscous damping is required to limit excessive movement which could occur as a machine operates at a speed near to, or coinciding with the resonant frequencies of the system. Generally this problem arises during slow run up and run down of rotating machines and during impact at each stroke in presses and hammers.

4.	Coefficient of Friction	0.8
5.	Shore a Hardness	90-92
6.	Working Temp. Range (°C)	-20 to +70
7.	Oil and Chemical Resistance	Resistance to Fuels, Lubricating Oils, Cutting Oils, Water and Ozone
8.	Construction	Composite material made from Nitrile Rubber, Cork Particles and Polyester Fibre. The composite material ensure high damping capacity, high compressive strength and high load capacities.

Brings to India the most advanced Smart Active Vibration Control Systems
Offering advancement towards Industry 4.0 compatibility
with AI and ML function

Advanced Vibration Isolation

Marketed in India By:

Dynemech
VIBRATION TECHNOLOGY

Highly vibration sensitive equipments like Electron Microscope need protection from environmental vibrations especially in low frequencies to function with any precision & repeatability to provide high resolution, high magnification images as per their output criteria.

K&S ArisMD PRO series provides Active Vibration Isolation in a wide frequency range, starting from 0.5Hz

K&S ArisMD PRO series is a lightweight and compact Table Top active vibration isolation system. The streamlined design integrates it with the workstation environment, and its straightforward composition requires no follow-up tuning.

- No piezo electric elements in use
 - ★ Practically unlimited life time for sensors and motors, using by K&S systems
 - ★ Significantly lower life time cost
- Easy installation for heavy tools – no need for lifting tools and heavy construction.
- Highly Tunable Vibration Isolation Control – the systems can be configured to challengeable environmental conditions

APPLICATIONS

Spring Visco Dampers for High Speed Press

Wedge Mounts for SMT Machine

Mahr Precision Length Measuring Machine on Pneumatic Isolators

VMC Machine on Spring Viscous Dampers

APPLICATIONS:

- ★ Power Presses
- ★ Tool Room Machines
- ★ Plastic Injection Moulding Machines
- ★ CNC Turning / Machining Centers
- ★ Punching, Stamping & Shearing Machines
- ★ Coal Crushers, Turbines, ID/FD Fans
- ★ Precision Machine Tools (Turning Centers, Machining Centers, Grinding Machines)
- ★ CMM and EDM Machines
- ★ Press Brakes and Turret Punch Presses
- ★ Textile Machines
- ★ Forging Hammers
- ★ Generators, Compressors and HVAC Installations
- ★ Pressure Die Casting Machines
- ★ Printing and Packaging Machines
- ★ Food and Pharmaceutical Machines
- ★ Measuring and Testing Machines/Equipments (Surface Plates, Hardness Testers)
- ★ Anti-Vibration Tables and Isolation Platforms
- ★ Centrifugal Pumps and Fans
